Set Fixed Shares	When this feature is checked, in any situation when the user posts a bid/offer the system will refer to the default shares. When not checked the user can adjust the share amount.
Speed Mode	When the user posts an ECN order, this feature allows the user to post additional bid/offer on the same ECN without choosing the method (price can be adjusted). Also when Escape key is pressed, it will first cancel the method, so in order to cancel the pending order Escape key must be pressed again.
Push Mode	Sets the default to 100 shares.
Fast SOES Sell	If FastSoes Sell is on, the user can get out of his long position using the soes sell key without canceling his selling orders.
Prompt Message	will display on level II, when bidding or asking
Link Shares To Default	When this feature is checked it will automatically set the shares that you specify on level II to default.
Set Default Shares	Sets Default Shares to the current shares in the level II
Display Order	If unchecked the orders will be placed as hidden, if the ECN supports this type of order.
Show Reserve	Toggles between reserve On and Off for the selected ECN. Will show the specified amount of shares, while hiding the rest. Reserve Settings may be found in the Trade Settings
